XU photo-electric sensors
for packaging, food & beverage

Telemecanique Sensors presents an expanded XU range of application photo-electric sensors to be embedded in automated lines for the packaging market segment.

With their diverse technical characteristics, high performance and smart management capabilities, they are designed to address a wide scope of specific needs.

Packaging

Handling

Food and Beverage

Fast object detection

Sensor family per application

- > Marking detection
- > Very dark and light-absorbing object detection
- > Accurate detection
- > Colour object detection, from simple colour to very complex colour sorting
- > Transparent object detection, with or without reflector

Five light spots

Select the perfectly suitable light spot

- > **Laser light:** to detect very small objects and contrast marks with pinpoint accuracy, even at a long sensing distance
- > **White light:** for simple contrast detection (high contrast), short distances
- > **Blue light:** for low-reflectivity objects, especially dark ones. Blue light short waves mean less penetration, resulting in higher surface reflection.
- > **Red light:** for detecting objects at a long distance and for very absorbing objects
- > **RGB light:** for more accurate contrast in colour prints

Designed for small spaces in packaging machines

Choose the casing, connection type and size

- > Plastic or metal casing
- > Pre-cabled, with pigtail or connector
- > Miniature, sub-miniature and compact size

Simple communication with the PLC via Ethernet

Smart devices communicate via IO-Link protocol

- > Install your new IO-Link sensor easily: automatic reading of the device identification file (IODD) and automatic detection of the sensor output mode
- > Automated parameter settings: configure the detection parameters
- > Extended diagnostics, with real-time information for optimised usage and maintenance

Presentation

IO-Link is a point-to-point network communication protocol dedicated to sensors and actuators offering advantages such as increased productivity, simplified integration and reduced inventory.

It enables:

- Simplified connection of sensors and actuators to the upper-level control and monitoring system of an automated line
- Advanced diagnostic functions, through continuous monitoring of critical parameters such as signal quality and sensor status
- Reduced commissioning time due to fewer cables and hot swappable devices
- Integration with third-party devices, thanks to multiple fieldbus protocol support (PROFINET, Ethernet/IP)

Telemecanique Sensors offers a wide choice of IO-Link conformant devices, with various detection systems such as thru-beam, diffuse, polarised reflex, etc.

IO-Link system

An IO-Link system consists of the following components:

- IO-Link Master
- IO-Link devices (sensors, RFID readers, valves, motor starters, I/O modules)
- Cabling
- Engineering tool for integration and configuration of IO-Link devices (Simply Config IO-Link Master software (2))

Description

IO-Link Masters

IO-Link Masters serve to capture digital inputs and outputs being conveyed between the PLC and the IO-Link devices.

Two types of IO-Link Master are available:

- **XZIO8AM12EY** Ethernet Master, for devices connected to an Ethernet/IP network
- **XZIO8AM12PY** PROFINET Master, for devices connected to a PROFINET network

An IO-Link Master enables:

- On the sensor side: IODD file management, sensor configuration, port diagnosis
- On the Master side: Master configuration, firmware update, factory reset, Master diagnosis, MQTT setting

Example of installation in line or star topology

Degree of protection	IP65, IP67, IP69K	
Ambient air temperature	Static cable	-40...+90 °C
	Flexing cable	-25...+80 °C
Conductor c.s.a	5 x 0.34 mm ²	
Cable diameter	5.85 mm ± 0.15 mm	
Nominal voltage	250 V ~, 60 V ---	
Nominal current	4 A	
Insulation resistance	> 10 ⁹ Ω	
Contact resistance	≤ 10 m Ω	

Dimensions

XZCRB151151C2, XZCRB151151C5

L = 2 or 5 m

Connections

Male connector type	M8, 3-pin, straight		
Female connector type	M8, 3-pin, straight	M8, 3-pin, elbowed	M8, 4-pin, straight
Number of conductors	3
